

“Solutions
to Water
Quality,
Quantity,
Permitting
and
Planning
Issues.”

HYDROGEOLOGIC SERVICES

- Groundwater studies
- Groundwater flow direction and velocity
- Water right permits, change in use, change in diversion
- Groundwater availability
- Groundwater/surface water interaction
- Geologic and hydrogeologic mapping
- Aquifer identification
- Wellhead protection
- Monitoring well design and installation
- Water supply well siting
- Well rehabilitation
- Water balance evaluation

The Water & Natural Resource Group brings over 17 years of experience to help our clients with the challenges of managing water issues throughout the northwestern United States. Our experience encompasses private and public clients in assisting them through the regulatory requirements to manage our water resources and watersheds. We do this by upholding our purpose of providing professional and technical expertise to find cost effective and creative solutions to water quality, quantity, permitting and planning issues with our clients' interests as the top priority.

*“Professional Quality
with Personal Service.”*

Licensed Hydrogeologist: WA, CA
Registered Geologist: WA, ID, OR, CA, WY
OSHA 40-hr Certified

WATER & NATURAL RESOURCE GROUP SERVICES

“Solutions to water quality, quantity, permitting & planning issues”

WATER QUALITY

- Groundwater quality studies
- Surface water quality studies
- TMDL Load Allocations
- Road Abandonment and Maintenance Plans
- Stormwater monitoring
- Erosion and Sediment Control Plans
- Temperature management plans
- Source identification and mitigation

ENVIRONMENTAL ASSESSMENT & REMEDIATION

- Phase I ESA
- Site assessment
- Remedial investigation/feasibility studies
- Remedial system design, installation, operation, and maintenance
- Permitting
- Groundwater monitoring
- Compliance monitoring
- Air quality
- SPCC plans
- IRAP/RBCA

WATER QUANTITY

- Water right transfer
- Surface water/groundwater interaction
- Water budgets
- Hydrogeologic investigations
- Surface water flow studies and monitoring
- Stream evaluations
- Aquifer characteristics evaluations
- Aquifer recharge studies
- Irrigation efficiency studies

NATURAL RESOURCES

- NEPA/SEPA
- Permitting
- Wetland delineation
- Critical area ordinances
- Habitat mitigation/restoration
- Watershed planning and analysis
- Bank stabilization and slope stability
- Geologic mapping and mining services
- Forestry planning
- Road Abandonment and Maintenance Plans
- Natural hazard assessment and planning
- Wildlife and fisheries enhancement studies

GRANT & TECHNICAL WRITING

- Funding identification
- Grant writing
- Technical writing
- Facilitation services
- Regulatory liaison
- Quality Assurance Project Plans (QAPP)
- Sampling and Analysis Plans (SAP)
